AASTHA BAJAJ

Aspiring product professional skilled in SQL, user research, and agile methodologies.

aasthabajaj0220@gmail.com | Aastha Bajaj | LinkedIn | AAstha-Bajaj | +91 8979468760

Computer Science student with experience in product strategy, user research, and MVP development. Skilled in SQL, product analytics, data-driven decision-making, and no-code prototyping. Strong foundation in system optimization, user-centered design, and agile methodologies. Demonstrated leadership in entrepreneurial initiatives and proven ability to collaborate across functions to deliver scalable solutions.

EDUCATION

B.Tech in Computer Science
Galgotias University, Greater Noida | 2022 – 2026 | CGPA: 8.71 (up to the 8th semester)

Class XII (Senior Secondary Board)
Aligarh Muslim University, Aligarh | 2022 | Percentage: 87.8%

Class X (CBSE)
Blue Bird Senior Secondary School, Aligarh | 2020 | Percentage: 88%

EMPLOYMENT HISTORY

Founder's Office Intern | Warmhlee | May 2024 – Aug 2025

- Supported product strategy by conducting user interviews and competitor benchmarking, influencing 3 new feature proposals.
- Contributed to MVP planning and feature documentation, ensuring alignment with business goals and user needs.
- Optimized onboarding flow, reducing user drop-off during sign-up (simulated tests showed ~15% improvement).
- Collaborated with cross-functional teams (design, tech, marketing) to define product requirements and roadmap milestones.
- Built analytical dashboards (Google Sheets & Mixpanel) to track early engagement metrics and improve decision-making.

Incubation Intern | GIC-RISE | Sept 2024 – May 2025

- Assisted 10+ early-stage startups with market research, product validation, and go-to-market (GTM) strategy.
- Conducted competitor mapping and user persona development to guide startup positioning.
- Supported pitch deck creation and demo day preparation, helping startups refine value propositions.
- Participated in mentorship sessions and documented key insights for founders to improve product-market fit.
- Coordinated with incubation leadership to streamline workshops, networking events, and founder-investor connects.

PROJECT

ResearchMind: Multi-Agent AI Research System

- Architected and deployed a multi-agent autonomous framework leveraging LangChain (LCEL) and Streamlit to automate complex web research, deep content scraping, and document generation.
- Engineered a distributed team of 4 specialized intelligent agents (Search, Reader, Writer, and Critic) managed through a shared memory system to coordinate sequential data workflows.
- Integrated custom orchestration tools using the Tavily Search API for real-time web querying and BeautifulSoup (bs4) for deep-text content parsing and automated HTML cleanup.
- Implemented an iterative evaluation loop utilizing an autonomous Critic Agent to evaluate, score, and provide feedback on generated reports, optimizing factual accuracy and content structure.

SuperClub Rewards Store

- Designed and prototyped a game-native rewards marketplace connecting gameplay-earned Coins with real-world rewards through a Play → Earn → Spend → Unlock user journey.
- Built an interactive end-to-end experience covering missions, Coin earning, personalized reward discovery, progress-based unlocking, product details, and Coins + cash checkout using React and Tailwind CSS.
- Defined product assumptions, key UX decisions, and success metrics around reward discovery, Coin redemption, checkout conversion, and repeat gameplay; deployed the working prototype on Vercel.

Rapido Kids | Product Management Case Study

- Conducted user research and competitor analysis to identify gaps in child ride safety.
- Designed Rapido Kids, defining MVP features, user flows, and safety mechanisms.
- Developed GTM strategy, rollout roadmap, and success metrics for feature launch.

SKILLS

Product Management: Product Strategy, Roadmap Planning, User & Market Research, Competitive Analysis, Feature Prioritization, MVP Definition, Experimentation & A/B Testing, Product Analytics, GTM Strategy, Agile/Scrum
GenAI in Product: Generative AI Feature Design, LLMs, RAG, AI Agents, Prompt Engineering, LangChain, LangGraph, Voice AI (Vapi AI)
Technical Fluency: SQL, Python, REST APIs, FastAPI, SQLAlchemy, Pydantic, API Integration, Databases & System Architecture, GCP, Docker
Automation & Workflow: n8n, Make.com, Tavily API
Data & Analytics: Mixpanel, Power BI, Google Analytics, Data Extraction & Analysis, User Behavior Analysis
Tools: Git, GitHub, Streamlit, BeautifulSoup, Airtable, Notion, Trello, Figma, Canva
Professional: Stakeholder Communication, Cross-Functional Collaboration, Problem-Solving, Quality Assurance

CERTIFICATIONS & ACHIEVEMENTS

- Electronic Arts's Product Management on Forage
- Product Analytics Micro-Certification (PAC), Product School & Mixpanel
- AI Micro-Certification (AIC), Product School
- Product Management 101
- LLM Foundations Certified PM
- President, E-Cell, Galgotias University (2024 - 2025)
- 2x Pre-Qualifier Finalist, Smart India Hackathon
